Technical toolkit

Software development

Python · FastAPI · Django
Bash · Go · JavaScript · SQL

Linux & infrastructure

Docker · Linux · Proxmox
VMware · KVM · Terraform · Ansible

Cybersecurity

Pentesting & vulnerability discovery
Nmap · Nuclei · Network security

AI & automation

Ollama · LangChain · n8n
Local agents & self-hosted workflows

Education

Computer Science

University of Oxford

As listed in the GitHub profile

- Open to learning & collaboration

01 Profile

Computer Science student focused on software development, infrastructure and cybersecurity. Exploring Python APIs, a self-hosted homelab and local AI agents, with an interest in clean code, scalable architecture, privacy and continuous learning.

02 Featured projects

SecAuto

Active

Automation for security scanning, enumeration and reporting.

Python / n8n / Docker / PostgreSQL

github.com/ndnimanima/secauto ↗

OfflineAI-Agents

Active

Local AI agents using Ollama and LangChain.

Python / Ollama / LangChain / FastAPI

github.com/ndnimanima/offline-ai-agents ↗

Homelab-Infra

In progress

A Proxmox homelab managed as infrastructure as code.

Terraform / Ansible / Proxmox

github.com/ndnimanima/homelab-infra ↗

NetRecon

Planned

Planned network and vulnerability discovery tooling.

Go / Nmap / Nuclei / SQLite

github.com/ndnimanima/netrecon ↗

> Featured in the profile README. These repositories belong to ndnimanima; their inclusion is not a claim of independently verified ownership.

03 Learning direction

Penetration testing, web security and system hardening.

OSCP / OSWE are future goals, not earned certifications.

04 Learning, shared

Free resources on local AI, agents and n8n automation.
